The right solution

Self-funded health plan administration

The speed of change in the health care industry is expanding the definition of health care and redefining roles for traditional players. New and emerging technologies led by single point solution vendors, rising health care costs, regulation, and non-traditional market entrants have many payers and health systems evaluating their options.

At AmeriHealth Administrators, we have a proven history of working with employer and payer clients to address their challenges and have the vision, technology, and people to meet the needs of our customers and partners.
